

# AI-powered procurement excellence

*Elevate your procurement data by seamlessly applying standard international product categorisation, enabling informed decision-making.*

Introducing the only precision UNSPSC<sup>1</sup> categorisation software tool in market— from Darterise.

**Get Data Wise and ahead of the competition with our AI solutions for procurement professionals.**

## The challenges with procurement data:

- I. Procurement data is typically comprised of purchase order or accounts payable reports, as well as additional inputs from sources such as general ledger and supplier sales reports, to improve accuracy;
- II. The scale and often unstructured format of procurement data requires overlaying intelligence to transform the data into a structured and user-friendly format.

## Why doing nothing is a risk:

Data is fundamental to effective procurement execution and data-driven insights empower procurement teams to:

- Develop robust market engagement strategies;
- Accurately quantify opportunities and benefits;
- Identify and mitigate potential risks;
- Drive continuous improvement and long-term sustainable outcomes

## How does Darterise AI solutions deliver:

Harnesses open-source Large Language Model (LLM) technology to **extract** the essential **product features** of unstructured procurement data and using machine learning algorithms store it as vector and map it to a standard product category available in the model;

User-friendly user interface for submitting data and retrieving your results

| Item Desc   | Supplier                  | Unit Price | UOM    | Order Qty | Order_Value | AI Response  | UNSPSC Commodity   | Similarity Score |
|---|---------------------------|------------|--------|-----------|-------------|--|--|------------------|
| Vircell Chlamydia Trachomatis DNA Control   | ACME Medical Supplies     | 760        | EACH   | 0         | 760         | The Vircell Chlamydia Trachomatis DNA Control is used for quality control and performance monitoring of Chlamydia trachomatis. It helps ensure the accuracy and reliability of test results by monitoring the performance of the testing process. Standardized controls are critical for maintaining consistency to restore patient tests that have extensive decay or damage. They provide a durable and cost-effective solution to protect and restore the test's structure, allowing for normal function. | Virology quality controls or calibrators or standards                        | 0.833468039      |
